

Name: _____

Math Computation Riddles 2

A farmer has goats, horses and chickens on his farm. The number of horses is double the number of goats. The number of chickens is five times as many goats. The animals have a total of 44 legs. How many of each animal does the farmer have?

I have 2 secret numbers. Each number has 2 digits. The secret numbers use the same digits, only reversed. The difference between the two secret numbers is 54. The sum of the digits in each secret number is 10. What are my two secret numbers?

Find a way to get the number 23 by only using the number 2 in an equation.

Create your own riddle! Write it in the box below. Then write the answer on the back!
