

Name: _____

Fractions Choice Board

Choice Activity #1: **Math Music**

Write a song that can be used to teach other students about fractions. You could teach them any concept about fractions that you choose! You may type or write the lyrics to your song.

Choice Activity #2: **Make a Quilt**

Use graph paper (or any paper) to design a quilt. Use 4 colors, and when every square is shaded in and the quilt is complete, determine the fraction of each color.

Choice Activity #3: **Create a Game**

Create a new game to practice fractions. Be sure to include directions and anything you need to play.

Choice Activity #4: **When Will I Use This?**

You may complete/create one of the following to explain situations of when, in real life, you will need to have an understanding of fractions. When do people use fractions in real life, at home, or at work? Share your ideas by:

- Creating a Google slideshow
- Writing a story
- Making a poster
- Creating a comic
